

Environment Policy

Chelmer Group will, through the implementation of its environmental management system, policy and procedures, comply with relevant environmental legislation and regulations, and they will prevent pollution and continuously endeavour to reduce and minimize its impact on the environment.

The company will conduct regular reviews to determine environmental objectives and targets to try to continuously reduce the company's environmental impact.

The company aims to achieve this by:

- Reducing, re-using or recycling waste where practical.
- Managing effectively the handling, storage and disposal of materials and substances in accordance with current legislation and codes of practice.
- Identification of how to reduce our energy usage within the company.

The environmental management system, policy and procedures will be documented, implemented, and maintained in accordance with ISO14001:2015. They shall be made available to all interested parties.

The company considers the protection of the environment and therefore the implementation of this policy to be the responsibility of all its employees. Training requirements shall be regularly reviewed and suitable training shall be given as required to ensure all employees can actively participate and fulfil their responsibilities. Customers and suppliers shall be informed of our policy and encouraged to participate where practical.
